

BURN DOWN EDEN

Burn Down Eden is celebrating their 10th anniversary of existence in 2024. There's no better opportunity to have new songs released by the Technical/Blackened Death Metal force from Berlin.

With "DISMAL EPIPHANY" the five piece is going to release their newest LP in January 2025. With a new approach they started to market the first song in March 2024. Conceptually, they split their LP in two halves. The FIRST part DISMAL was fully released on April 05th, 2024 and backed up with videos for the songs one to five. The SECOND run started on August 15th, 2024 with releasing the video for the single "Epistrophy". Until December 6th, 2024 the guys are going to release the pending singles with a video drop every other month. They know how to celebrate a birthday.

Following the band's development over the last decade, every release that came out was a huge step up to the respective predecessor. It's now up to the market to decide, if the guys did it once again and are going to make the next step on their journey.
